- I feel as though we are provided with so many different learning tools that it is difficult to focus. All the resources I have make it feel overwhelming to learn this new subject and I could not find a resource to provide me with a basic understanding of course concepts, only in-depth details of the concepts. In the future i would recommend having an outline of what we need to know in the powerpoint, then going into further detail during the video lecture. The book should be a strong resource to turn to for any confusion on a subject but attempting to read it before learning the material only provides further confusion on the end of the student.
- The lectures and readings were very difficult to stay engaged with. The information was conveyed clearly, but not really interesting.
